PROFESSIONAL SUMMARY

Analytically driven finance professional pursuing an MSc in Finance (Investment and Asset Management) at UCC, with a Computer Engineering foundation supporting strong technical fluency with large data volumes, dashboards, and reporting tools. Skilled in building KPIs and management metrics, financial modelling, and cost/ratio analysis, translating complex financial information into clear, decision-ready reporting for stakeholders. Comfortable in fast-paced, cross-functional environments, with strong communication skills and a track record of accurate, well-documented analysis under deadline pressure.

EXPERIENCE

Citi - Investment Banking Virtual Experience Program (Forage) Apr 2026

Self-directed, skills-based simulation program covering investment banking analysis

- Given a financial dataset with unexplained cost and reporting discrepancies, investigated root causes using structured analysis, enabling data-driven decision making with zero unresolved variances at handoff.
- Tasked with assessing intrinsic value for target companies, performed comparable company analysis and DCF valuation, delivering clear, stakeholder-ready investment recommendations.
- Facing a deadline-driven reporting cycle across multiple stakeholders, prepared and reconciled financial reports for accuracy mirroring quarter-end close and forecasting discipline and delivered all reports on schedule.

RELEVANT PROJECTS

Equity Investment Analysis and Financial Statement Evaluation Feb 2026

- Tasked with benchmarking sector performance, analysed financial data across 6 publicly listed companies over a 5-year horizon to surface key cost and profitability drivers.
- To assess company financial health, computed and interpreted 20+ financial ratios (ROE, current ratio, debt-to-equity, asset turnover), producing a clear profitability, liquidity, and efficiency assessment that informed cost and margin analysis.
- Needing to organise large volumes of company data, built Excel valuation models and used SQL and Python (Pandas, Matplotlib) to curate data visualisation dashboards, turning raw data into clear, actionable outputs.
- Set the goal of identifying the optimal equity allocation, delivered a EUR 10,000 investment recommendation projecting an 11.2% compound annual return over five years.

Portfolio Optimisation and Alternative Investments Analysis Nov 2025

- Given 36 months of historical return data across 5 asset classes, analysed risk-return trade-offs to surface cost optimisation opportunities within the portfolio.
- Aiming to reduce portfolio risk, conducted regression analysis to estimate market exposure and derive performance factors, achieving 12% lower volatility and an 18% Sharpe ratio improvement through data-driven allocation.

EDUCATION

University College Cork Sep 2025 – Present

Master of Science in Finance (Investment and Asset Management)

- Coursework: Financial Reporting, Corporate Finance, Financial Statement Analysis, Risk Management, Investment Analysis, Statistics, Business Analytics, Financial Modelling.

Savitribai Phule Pune University Sep 2020 – Apr 2024

Bachelor of Engineering in Computer Engineering

SKILLS

Finance & Analysis: KPI & Management Metrics Reporting, Cost & Ratio Analysis, Financial Modelling & Forecasting, Financial Statement Analysis, Complex Financial Information Analysis, Quarter-End Close Support.

Data & Tools: Advanced Excel, SQL, Python (Pandas, Matplotlib, Seaborn), Power BI, Data Visualisation Dashboards, Bloomberg Terminal.

Core Strengths: Analytical & Problem Solving, Business Partnering & Stakeholder Communication, Attention to Detail, Adaptability in Fast-Paced Environments, Cross-Functional Collaboration.

CERTIFICATIONS

- Financial Analysis and Modelling Professional Certificate - Corporate Finance Institute (CFI)
- Data Visualization Using Python - IBM
